1 EXECUTIVE SUMMARY & BRAND IDENTITY

Magic Scissors was conceptualized and engineered from scratch as an ultra-luxury digital flagship for a premium salon brand. Rather than functioning as a conventional appointment portal, the web experience synthesizes **cinematic luxury**, **editorial fashion typography**, and **modern Italian salon aesthetics** into a tactile, high-performance web experience.

AESTHETIC PALETTE Warm Alabaster Silk (#FAF8F5), Champagne Terracotta Bronze (#B86B49 , #D49A7E), and Deep Noir Charcoal (#15171C).

TYPOGRAPHY **Cinzel** (Monumental Serif Headings), **Cormorant Garamond** (Editorial Cursive Accents), and **Plus Jakarta Sans** (Precision UI System).

2 PHASE I: FOUNDATION & MULTI-PAGE ARCHITECTURE

The project was constructed on a decoupled multi-page **Vite** build architecture configured in `vite.config.js`, eliminating client-side SPA routing overhead while maintaining lightning-fast hot module replacement:

- `index.html` — Flagship Showcase, Theatrical Curtain Entrance, 3D Shears Viewport, Molten Ring Gallery.
- `about.html` — Salon Heritage, Clean Artisanship Standards, Senior Stylist Profiles, Refreshment Lounge.
- `services.html` — Precision Hair Craft, Skin Therapies, Scalp Spa Treatments, Bridal Packages & Price Catalog.
- `gallery.html` — Spatial Bento Showcase, Illuminated Arena Views, Treatment Suites, Fullscreen Lightbox.
- `franchise.html` — Partnership Inquiries, Studio Boutique vs. Flagship Tier Comparison, ROI Breakdown.
- `contact.html` — Real-time Appointment Desk, Dialpad Direct Calling, WhatsApp Linkage & Embedded Maps.

Modular CSS Design Architecture

The styling system is partitioned cleanly to prevent code duplication and enforce consistency:

- `css/main.css` : Core color tokens, typography scales, safe-area variables (`--sat` , `--sab` for iOS Dynamic Island), and base tactile button ripple effects.
- `css/components.css` : Sticky luxury navigation, brand scissor mark, footer, forms, and dialogs.
- `css/responsive.css` : Granular breakpoints for Ultra-wide 4K, Desktop, Tablet, and Mobile viewports.
- `css/feedback-skeletons.css` : Shimmer skeleton states, toast alerts, and inline error badges.

3 PHASE 2: CORE INTERACTIVE ENGINES

3.1 Three.js 3D Shears Experience (`js/3d/hero-3d.js`)

The hero section houses a live WebGL 3D interactive viewport rendering realistic metallic salon shears. Specular reflections and champagne bronze rim lighting dynamically respond to mouse tracking on desktop and device gyroscope movements on mobile.

Adaptive Device Detection (`js/3d/device-detection.js`): Automatically assesses GPU capability and connection speed. High-performance devices receive 60 FPS multi-light rendering with shadow maps; low-power mobile devices gracefully switch to high-resolution photography without lag.

3.2 Dual-Channel Real-Time Booking Engine

Magic Scissors implements an innovative dual-booking mechanism designed for zero drop-off:

- 1. **Direct WhatsApp Automation:** Customer inputs (client name, contact number, chosen service, preferred stylist, and time slot) are sanitized and compiled into a pre-filled, encrypted WhatsApp URL, allowing one-tap booking directly to the salon reception.
- 2. **Supabase Cloud Real-time Desk:** Powered by `supabase_schema.sql` and `js/auth.js`. Incoming bookings are recorded in a PostgreSQL database, powering staff notification badges (`#openConciergeBtn`) in the site header.

4 PHASE 3: THE THEATRICAL CURTAIN ENTRANCE

To deliver a memorable first impression, a theatrical intro sequence was developed in `css/intro.css` and `js/intro.js` :

SEQUENCE STEP	VISUAL & INTERACTIVE ACTION	TECHNICAL IMPLEMENTATION
1. Dark Stage	Heavy dark velvet curtains frame the viewport with a rolling salon chair track.	Absolute viewport overlay with <code>z-index: 1000</code> and ambient vignette.
2. Audio & Snip	Mechanical shears perform an animated open-close snip with sound cue.	CSS keyframe scissor snip + Web Audio API synthesizer pulse.
3. Cue Action	Luminous "Enter Salon" CTA illuminates with subtle pulse ring.	Pill button with animated radial borders and accessible focus.
4. Curtain Part	Left and right heavy velvet curtain panels glide outward smoothly.	<code>transform: translateX(±100%)</code> with custom cubic-bezier easing.
5. Light Flood	Warm champagne amber light floods into the darkened salon backdrop.	Dynamic radial gradient opacity transition.
6. Logo Reveal	Magic Scissors monogram reveals with blur-to-sharp shimmer sweep.	<code>filter: blur(12px) → blur(0px)</code> with specular gold sheen.
7. Site Dissolve	Stage overlay dissolves seamlessly into the live 3D hero showcase.	Smooth opacity dissolve; session stored in <code>sessionStorage</code> .

5 PHASE 4: VISUAL EVOLUTION — MOLTEN RING GALLERY

The salon imagery gallery was elevated from a traditional static grid to an interactive **Molten Ring 3D Carousel** (`components/ui/molten-gallery.tsx` and `css/molten-gallery.css`):

- **Curved Glass Aesthetics:** Cards feature smooth 24px rounded corners, illuminated champagne bronze glowing borders, and dark glass reflections.
- **Physics-Driven Inertial Gestures:** Supports touch swipe on mobile and mouse drag on desktop with realistic momentum decay.
- **Auto-Rotation & Pause:** Subtle continuous 3D rotation that pauses automatically on hover or touch interaction.
- **Editorial Metadata Strip:** Interactive badge displaying Category (e.g., *Bridal · Haute Makeover*), Title, Year, and Description with deep-links to services.

6 PHASE 5: REFINEMENTS, MOBILE POLISH & BUG FIXES

Continuous development sprints focused on rigorous usability audits, accessibility, and visual harmony:

Key Sprint Polish Milestones:

- **Brand Button Uniformity (6bfccfb)**: Harmonized all primary and secondary buttons into the established brand styling system (.btn-gold , .btn-outline-gold , .btn-whatsapp , .btn-call).
- **Mobile Booking Conversion Hierarchy (2d2bbf4)**: Re-ordered the appointment booking form above studio contact details on mobile screens to minimize client scroll fatigue.
- **Typography De-Cluttering (31f4782 , 2a97be0)**: Stripped away distracting red notification dots and excessive badges in favor of refined, editorial whitespace.
- **Instagram CTA Card Overflow (d30c0c2)**: Eliminated horizontal overflow on narrow mobile screens (320px–375px) via responsive flex wrapping.
- **Footer Operating Hours Alignment (5033cb4)**: Re-aligned text, luxury padding, and champagne borders inside the operating hours card.
- **Minimal Circular Video Controls (c742cab)**: Replaced generic browser video bars with custom floating glass play/pause and mute controllers.

7 PHASE 6: TESTING & DEPLOYMENT AUTOMATION

7.1 Automated Node.js Verification Suite (scratch/test-suite.js)

A zero-dependency verification harness tests all critical user paths without requiring heavy testing frameworks.

Test Suite Result: 74 Passed, 0 Failed

- ✓ ButtonLoader (Zero-CLS, aria-busy, spinner injection, text restoration)
- ✓ ErrorClassifier (Network, Auth, Registration, File Size/Type errors)
- ✓ FormValidator (Appointment Form & Franchise Form valid/invalid states)
- ✓ Skeleton Generator & EmptyState HTML Markup
- ✓ ToastManager (Toast titles, auto-dismiss, retry callback)
- ✓ StylePhotoUploader (Object URL generation, decode failure handling, WebP previews)
- ✓ Gallery Content Integrity & Lightbox HTML integration across all pages

7.2 Workflow Automation Scripts

- workflow.bat : Runs dependency validation, full 74-assertion test suite, production build, and boots the local dev server.
- start.bat : Rapid development launcher with automatic browser opening at http://localhost:3000 .
- deploy-netlify.bat : Two-step build and automated production deployment to Netlify CDN.
- deploy-preview-netlify.bat : Staging branch preview deployment for client reviews.

8 THE COMPLETE CLIENT EXPERIENCE (USER JOURNEY)

STAGE	CLIENT ACTION	SYSTEM RESPONSE & LUXURY ATMOSPHERE
1. The Arrival	Lands on index.html	Stage curtains closed; mechanical scissors snip; "Enter Salon" CTA shines.
2. The Reveal	Taps "Enter Salon"	Heavy velvet curtains part; warm amber lighting floods in; logo shimmers and dissolves into the hero.
3. The Atmosphere	Explores Hero & Shears	Interactive 3D metallic shears react to cursor/touch; live salon view slides in the background.
4. The Craft	Scrolls Molten Gallery	3D curved cards rotate smoothly; glowing champagne borders highlight VIP bridal and styling arenas.
5. Service Discovery	Clicks "Explore Services"	Opens comprehensive catalog with transparent pricing, treatment descriptions, and duration badges.
6. The Reservation	Submits Booking Form	Form validates instantaneously; generates WhatsApp pre-formatted reservation and registers in Supabase.

STAGE	CLIENT ACTION	SYSTEM RESPONSE & LUXURY ATMOSPHERE
7. Ongoing Care	Contacts Front Desk	Direct dialpad button connects to desk phone (+91 99601 35849); Google Maps link opens directions.

9 COMPLETE GIT COMMIT CHRONOLOGY

The complete engineering timeline from initial repository initialization to the latest production release:

COMMIT	MESSAGE / FEATURE DESCRIPTION	IMPACT AREA
d7e0b2f	Initial commit	Base architecture, multi-page setup
476aeb4	Add GitHub Actions workflow for client preview deployment	CI/CD Automation
0edf894	feat: add production loading states, skeletons, toast notifications, form validation	UI Feedback & Reliability
adc4e38	Add button colors and refine copy to sound more human	Editorial Tone & Styling
278234a	Fix missing image assets on GitHub Pages and make phone button visible on hero	Asset Paths & Call CTA
31f4782	Remove unnecessary decorative eyebrow headings and red dot labels from all sections	Visual De-Cluttering
d30c0c2	Fix Instagram CTA box overflow and responsive layout across mobile viewports	Mobile Layout Polish
c742cab	Replace Studio Tour video control bar with minimal circular floating controls	Media Interaction
2d2bbf4	Shift appointment booking form above studio info card on mobile	Mobile UX Conversion
2a97be0	Remove customer designations from client reviews	Editorial Copy Polish
c1dfe15	Enhance mobile accessibility and native iOS/Android experience across all pages	Accessibility & Safe-Areas
6f8cde6	Fix footer spacing, layout collision, and styling across all tabs	Footer Layout Harmony
5e9016e	Fix location showcase box data overflow and mobile button stacking	Contact Page Polish
0b00529	refine: comprehensive UI/UX polish - fix text colors, gallery heights, tablet layout	Responsive Grids & Balance
c8d257f	feat: cinematic logo reveal sequence after curtain open — blur-to-sharp, shimmer	Theatrical Brand Entrance
8a41817	feat: cinematic intro sequence with opening stage, curtain reveal & slow fade dissolve	Curtain Stage Experience
951f169	feat: integrate Molten Ring Gallery, enhance card sizing, curvy edges with glowing border	3D Carousel Showcase
f0ea9c2	fix: mobile alignment and layout balance for Molten Gallery	Mobile Gesture & Alignment
6bfccfb	refactor: remove pearl button and restore consistent brand buttons	Design System Harmony
5033cb4	fix(footer): align text inside operating hours card with luxury padding and borders	Footer Typography Polish
